

EANS Instructional Services Packages

INSTRUCTIONAL SERVICES PACKAGES DESIGNED FOR EANS FUNDS

What is EANS?

The Emergency Assistance to Non-public Schools (EANS) relief program has offered billions of dollars in funding to non-public schools across the U.S. Its purpose is to help schools recover from hardships or loss as a result of the COVID-19 pandemic.

HOW CAN THE FUNDS BE USED?

According to the Department of Education, EANS funds can be used for “activities related to safely reopening schools, continuing instruction, and addressing learning loss”. It’s a fairly broad definition for a reason – there are a lot of ways you can use the funds. One way we can help is by providing research-based Instructional Services to help students learn in the way that’s best for them.

EANS-EXCLUSIVE INSTRUCTIONAL SERVICES PACKAGES

Many students (and some teachers) suffered learning loss in 2020-21. To help you identify and address those needs and support those impacted, we’ve created a number of Instructional Services packages designed specifically to be paid for with EANS funding. Here’s a high-level look.

- Interventions, Grades PK-12
- Individual Tutoring, Grades 2-12
- Meeting the Needs of English Language Learners
- Early Childhood Teaching and Learning

INTERVENTIONS TO CLOSE SKILLS' GAPS

We use a **blended learning** solution to close students' skills gaps. FACTS Education Solution's blended learning model affords PK-12 students the opportunity to learn through direct instruction from a highly qualified Interventionist as well as through digital learning, which targets each student's specific skills' gaps. Our Interventionists determine the right balance of direct instruction and digital learning based on the needs of each student served.

INDIVIDUAL TUTORING

FACTS Ed offers before- and after-school tutoring sessions in reading and mathematics. These sessions are focused on getting students in grades K-12 back on track and prepared for the future. Our sessions are designed to identify a student's strengths and learning gaps, then tailor a learning path specifically for them. Utilizing a blended learning approach, which involves two 30 to 45-minute online sessions per week and monthly progress reports, we're able to give each student targeted, individual attention and keep parents involved.

MEETING THE NEEDS OF ENGLISH LANGUAGE LEARNERS

This three-year professional learning plan is designed for leaders, teachers, or teams of teachers – and is a great fit for those with or without an existing ELL program. The PD plan includes workshops, video coaching, and collaborative assessment of existing EL lessons. Plus, teachers within the program will receive debriefs and ongoing support from a certified EL Coach.

EARLY CHILDHOOD TEACHING & LEARNING

Early childhood education is critical – it sets the foundation for a student's future success, and it's important to get it right. In this program, we offer professional learning and coaching to build confidence and self-efficacy in early childhood teachers and program directors. Plus, this program meets the standards set by the National Association for the Education of Young Children (NAEYC). It's a program beneficial for everyone – from new hires who need to catch up to returning team members who want the chance to refine their skills.
