

Elevate Your Network of Solutions

We want to help your district elevate the education experience for everyone. From the classroom to the IT office, we'll create an integrated experience that meets the needs of the entire school.

Connected Solutions. Connected Districts.

Your district is unique. We get that. So we'll only recommend solutions that meet the specific needs of your district. No more. No less. Whether you need a student information system, a way to manage student billing, or targeted professional development for your teachers and staff, we have you covered. If it's an integrated district infrastructure you need, we can do that too.

STUDENT INFORMATION SYSTEM (SIS)

Our cloud-based, robust SIS brings you a connected school solution for the classroom, academic data, demographics, school lunch, child care, medical information, communications, reporting, and more. With our API, your data infrastructure can be as sophisticated as you need it to be, tying in everything from your LMS of choice to communication or IT management tools.

ONLINE PAYMENTS & STUDENT BILLING

Our flexible, centralized system expands the payment options for families and simplifies tracking and management for you. You can capture fees in a single system (streamlining processes), and families can rely on our customer-friendly interface and the highest data security standards in the industry.

ONLINE GIVING & FUNDRAISING

Our affordable fundraising solution is specifically designed for the needs of K-12 educational development efforts. This makes online giving and virtual fundraisers easy for donors and for staff with modern, responsive appeal pages and online event registration. Additional features like text-to-give functionality and real-time results tracking let you refine your strategies and keep your goals on track.

SCHOOL SITE

If you need an efficient, budget-conscious way to launch an eye-catching, responsive website, look no further than School Site. Our designs are beautiful, look great on any device, and are easy to update. And, our website content management system (CMS) lets you promote your vision and share information with families — all with strong branding for your institution.

FACTS FAMILY

Families can access grades, homework, calendars, resources, announcements, attendance, and more through our FACTS Family Portal and mobile apps. For more control over your app's branding, design, and features, we offer the FACTS Family Custom app, which puts your school's logo and name front and center. Engagement with families is easier with the use of push notifications and other communication features.

EDUCATION SOLUTIONS

Our Title II professional development resources integrate the latest technology to help you achieve and maintain educational and academic excellence. We can work with you to develop professional instruction based on your specific needs or you can choose from our catalog of courses that have been highly successful for schools throughout the nation.
