Get the FACTS About
FACTS SIS

FACTS — A nelnet Company

Are you struggling to find a student information system that meets the needs of your school? Here are some facts that may help.

Does FACTS work with many schools?

✓ YES

More than 5,700 K-12 schools in the United States and worldwide have selected FACTS SIS as their student information system provider. We have a 97% customer retention rate and close to 2,000 client schools are high schools or contain high school-aged students.

Has FACTS been in the SIS business very long?

✓ YES

FACTS acquired RenWeb in 2014 and the product was renamed FACTS SIS in 2018. FACTS SIS has over two decades of development built into the solution and one of the most comprehensive feature sets in the market. As the first cloud-based student information system available for schools, FACTS SIS has a deep institutional history of school management, data infrastructure, and feature development.

Will FACTS keep developing the SIS?

✓ YES

Unlike other solutions that were developed in the early 2000's, FACTS SIS continues to prioritize product strategy and development - with nearly 10x growth in those teams over the past seven years. FACTS believes in customer feedback driving development priorities. Various tools, client relationships, and customer support teams all contribute in communicating feedback about products, features, and roadmap requests to the development team.

Does FACTS have a fully integrated solution for SIS, enrollment, and billing?

✓ YES

FACTS' Premier integration offers sophisticated data connectivity between FACTS SIS and FACTS Payment Plans. It gives parents an SSO experience into their Family Portal, where they can see grades, attendance, tuition owed, and school bills—all in one place to view, pay, and more. Charge creation flows easily from the SIS back into FACTS financial management, and demographic data that is updated in FACTS SIS is reflected automatically in FACTS' financial solutions. Additionally, enrollment processes are streamlined with pre-populated data on forms and payment plan enrollment options available.

Is FACTS SIS in a single database?

✓ YES

When FACTS SIS was launched over 20 years ago, it was the original single database solution for K-12 schools. The system has undergone significant updates and development since then, but the original design—a single database solution—remains intact. With the introduction of Premier integration, FACTS created an incredibly effective and sophisticated billing system, and significant development resources continue to work toward the holistic singularity of the FACTS suite of products – financial and academic alike.
